In today's CC, you'll be using Dad Jokes API to get random dad jokes and show it to the user.

Also provide a button to fetch random jokes on click.

Click Here for GIF

While using fetch() function you'll also need to pass a header as per the requirement of the Dad Jokes API.
How to add headers to fetch()

Note:

- No embedded JavaScript. Your JavaScript code should be written in a .js/.mjs file and should be linked accordingly.
- You can design the UI in any way you like.
- Also focus on code readability and proper approach along with usage of ES6 and modules wherever possible.
